UK NPHPFF Low Bleed White

Features

- Plastisol ink formulated to prevent dye migration on fabrics, such as polyesters, polyester blends, re-dyeing fabrics.
- Suitable for under base printing when using coloured ink that of low opacity.
- Base is suitable for under base printing, and white is recommended for single usage.
- Glossy appearance, high opacity

Application

- Printing this product under base can prevent dye migration, so this can prevent discoloration of coloured ink on the top.
- Thicker printing of this ink can improve anti-migration.
- Anti-migration effect may reduce if mixed with normal Plastisol ink.
- For Flash Cure, 4 sec / 339°F(170°C) approx. is recommended

Remarks

- Stir before printing for convenient use.
- Check anti-migration effect before main printing, due to weakness of ink on some dyestuffs.
- Keep away from heat after curing if fabric has heavy dye-migration.
- Excessive curing may drive dye-migration severely.
- Conduct cure thoroughly to avoid losing adhesiveness and fastness.
- Conduct enough test before main printing.
- If needed to mix other product or material, please contact TGS for more information.

Eco-Friendly

- Compliant with CPSIA (Pb, Phthalates).
- Meet standard of Eco-passport, adidas
- TGS's product does not contain six regulated materials, but we do not examine whole product. We recommend to examine every kind of regulated materials and pre-testing for your own use purpose
